Tiny but complete IDE (since version 1.0.8) supporting the creation of 2D games and applets. Its source code is available from the mbed Nx team site (see link on top). See also: Its source code. Compilation instructions. Blogs. 2D game example. You may also use the mbed nx framework for simple or mid-scale projects that are based on the use of mbed nx's core functions. Gianfranco Ferré (born 11 November 1941) is an Italian fashion designer. He created the Gianfranco Ferré label, a fashion house based in Milan, Italy. He is known for his opulent and luxurious designs. Biography Ferré was born in Rome, Italy. His father was an architect and his mother was an opera singer. He left school at 14 and worked as a window dresser, earning a living by cutting leather. His first design for women's clothing was the boutique called "Gianfranco Ferré" on the Via del Babuino in Rome. His career as a fashion designer began in the early 1960s. In 1962, he designed a hat for English actress and model Anita Pallenberg. Pallenberg contacted him to design a hat for the cover of her book East of Suez (UK title: Love from the Streets). He met fashion photographer Helmut Newton, who became his mentor. He soon gained fame, becoming the official designer of the actress Anita Ekberg. His clothes were worn by many celebrities, such as the singers Maria Callas and Luciano Pavarotti. He designed the costumes for Callas's last performance at the Royal Opera House, Covent Garden in London in 1983. He became the designer of the Italian fashion label Elsa Schiaparelli. In 1992, he was named the official costume designer of the Banca d'Italia, which he would continue to design until he retired in 1997. He has also designed costumes for theatrical performances, such as his work in the play Eurydice, performed by Cecilia Bartoli at the Sala di San Donato in Milan, Italy. His fashion house, Gianfranco Ferré, is headquartered in Milan, Italy. His brand was registered in London in 1991, and in New York in 1997. 82157476af
